

VIVA - Health Literacy Videos

VIVA - Video Interactive Virtual Anatomy.

Designed for teachers and health professionals to help advance the health literacy of their students or clients, **VIVA** was first used in Australia with the native Aborigine population. **VIVA** has been successfully used around the world to educate people on their bodies as well as health conditions, chronic diseases, and the effects of certain lifestyle choices on the human body.

VIVA is available in two versions:

- School
- Medical Professional

All **VIVA** videos are narrated in English; content details are available on the reverse side of this sheet.

The videos can be viewed from a computer, tablet, or smart phone with Internet access.
